

WHAT IS CLAIMED IS:

1. An electric connection box comprising:

an insulating board disposed along a vertical direction;

a first bus bar having a lower potential provided on said

5 insulating board; and

a second bus bar having a higher potential provided on
said insulating board,

wherein said first bus bar is on an upper side of said
second bus bar in the vertical direction so as to be adjacent

10 to each other.

2. An electric connection box according to claim 1, wherein

said first bus bar and said second bus bar extend substantially
in a horizontal direction.

15

3. An electric connection box comprising:

an insulating board disposed along a vertical direction,

a first bus bar having a lower potential; and

a second bus bar having a higher potential,

20 wherein said insulating board is partitioned into at

least a first area on which said first bus bar is provided and

a second area on which said second bus bar is provided.

4. An electric connection box comprising:

25 an insulating board disposed along a vertical direction,

said insulating board being partitioned into at least a first area and a second area;

a first bus bar having a lower potential provided on said first area of said insulating board; and

5 a second bus bar having a higher potential provided on said second area of said insulating board,

wherein said first area is provided on an upper side of said second area in the vertical direction.
